What is the Atlanta Regional Collaborative for Health Improvement?

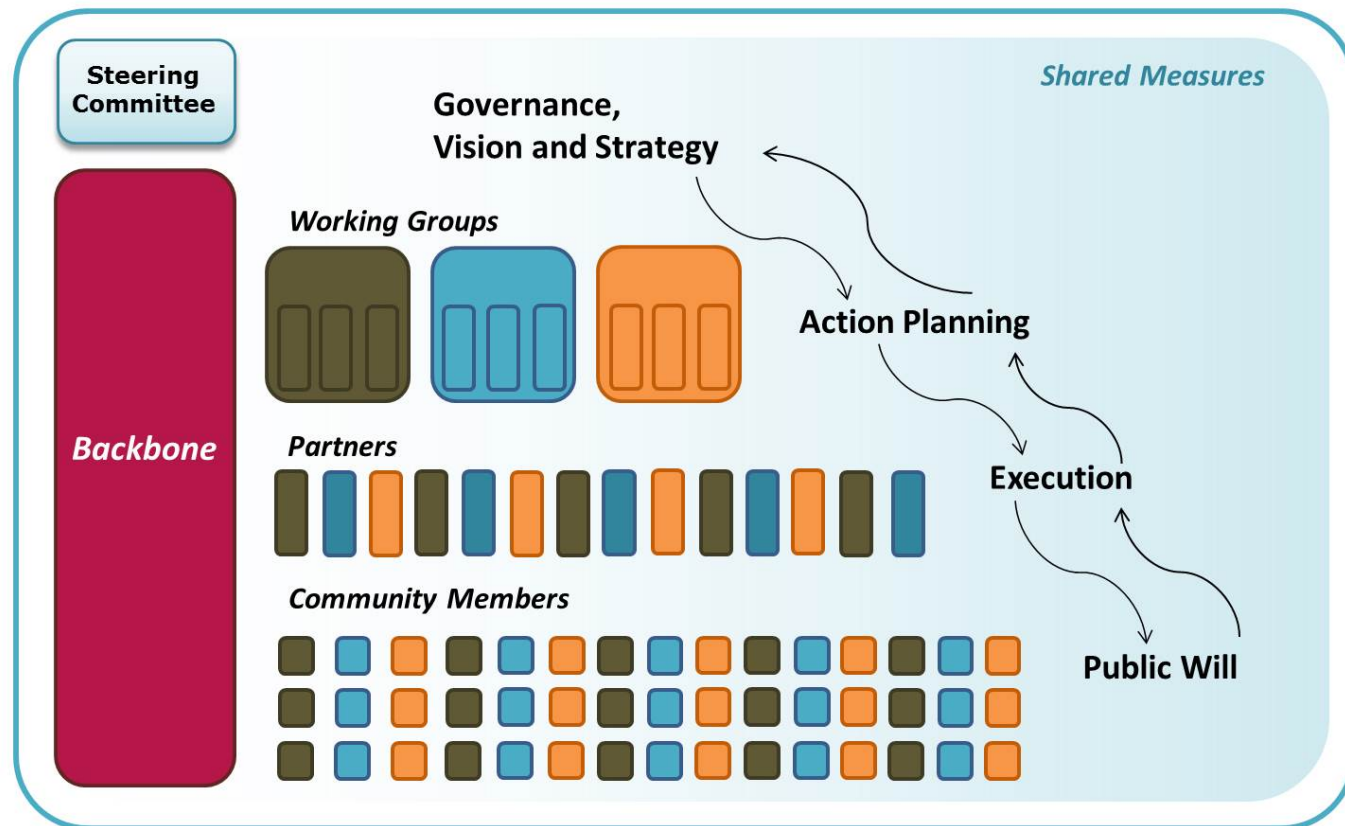

Problem

Fulton and
DeKalb Counties

Atlanta Regional Collaborative for Health Improvement

Structuring Efforts as “Cascading Levels of Linked Collaborative Work” Critically Enables Collective Seeing, Learning and Doing

Atlanta Regional Collaborative for Health Improvement

ARCHI Goals

Which goal should be prioritized for work to begin immediately?

1. Build alignment in Atlanta toward the ARCHI priorities
2. Align ARCHI partnership and resources
3. Build financial investment in ARCHI
4. Develop infrastructure to support ARCHI
5. Evaluation

Atlanta Regional Collaborative for Health Improvement

ARCHI Areas of Focus

- Stewardship
- Strategy
- Financing

Atlanta Regional Collaborative for Health Improvement

Atlanta Regional Collaborative for Health Improvement

Eight Design Principles:

1. Clearly defined boundaries
2. Rules adapted to local conditions
3. Collective decision making process
4. Monitoring by those involved
5. Graduated sanctions for rule violators
6. Cheap and accessible conflict resolution
7. Power recognized by higher-level authorities
8. Organization in layers of nested enterprises

Atlanta Regional Collaborative for Health Improvement

While Each Collective Impact Initiative Evolves Based on Local Context, These Four Phases Provide a General Guide to Thinking about an Initiative's Maturity

<i>Components for Success</i>	<i>Phase I Pre-Launch</i>	<i>Phase II Initiate Action</i>	<i>Phase III Organize for Impact</i>	<i>Phase IV Implementing and Sustaining Impact</i>
<i>Governance and Infrastructure</i>	Convene community stakeholders	Identify champions and form cross-sector Steering Committee	Create backbone infrastructure (backbone function, work groups, other collaborative processes)	Facilitate collaboration across groups; refine structure as needed
<i>Strategic Planning</i>	Hold dialogue about issue, community context, and available resources	Map the landscape and use data to make case; Begin to frame common agenda	Create common agenda (common goals and strategic priorities)	Support implementation (alignment of partners to goal and strategies)
<i>Community Involvement</i>	Facilitate community outreach specific to goal	Engage the community to help frame common agenda	Engage community and build public will around common agenda	Continue engagement and conduct advocacy
<i>Evaluation And Improvement</i>	Determine if there is consensus/urgency to move forward	Analyze baseline data to ID key issues and gaps	Establish shared metrics (indicators, measurement, and approach)	Collect, track, and report progress (process to learn and improve)

Four Kinds of Leadership Groups:

Decision-making Group

Coordinating Group

Consultative Group

Information-sharing and Alignment Group

Ruth Wageman, Harvard, **Building Great
Leadership Teams for Complex Problems**

Key reflections for determining type(s) of group you want to be:

- Not just “all of these” but which ones, for what leadership functions?
- What decisions—focus, strategy, priorities—are shared and done by consensus? For which will we authorize a small group?
- What are some priorities/outcomes for which it makes most sense to combine our resources and coordinate initiatives?
- What are some key challenges that different leaders or organizations face, for which advice and robust discussion would be especially valuable?

Ruth Wageman, Harvard, **Building Great Leadership Teams for Complex Problems**

Collaboration Questions:

- Do we agree what kind of collaborative we are going to be?
- Do we have a compelling shared purpose for this collaborative?
- Are the right people involved?
- Have we built the kinds of structures that allow this group to do it's work?
- Have we identified and secured the resources we need to work together
- Have we built an evaluation and learning process to enable course correction and improvement over time

Atlanta Regional Collaborative for Health Improvement

Agreements:

- Partners
- Steering Committee
- Executive Leadership Organizational Teaming Agreement

Intervention Options for Simulation Scenarios

The table below shows where the direct effects of each intervention concentrate.

<http://www.RethinkHealth.org/Dynamics>

RISK		Behaviors		Crime		Pathways to advantage (family; student)
		Environ hazards				
CARE		Prev/chronic		Self-care		Hospital infections
		Mental illness				
CAPACITY		PCP efficiency		Recruit PCPs (general; FQHC)		Hospital efficiency
COST		Pre-visit consult		Coordinate care		Post-discharge care
		Medical homes		Shared decisions		Malpractice
				Generic drugs		Hospice
TRENDS		Uninsurance		Primary care slots for Disadvantaged		Inflation rate
		Local economy				
FUNDING		Innovation fund		Capture & Reinvest		Contingent Global Payment

Which scenario offers the strongest foundation?

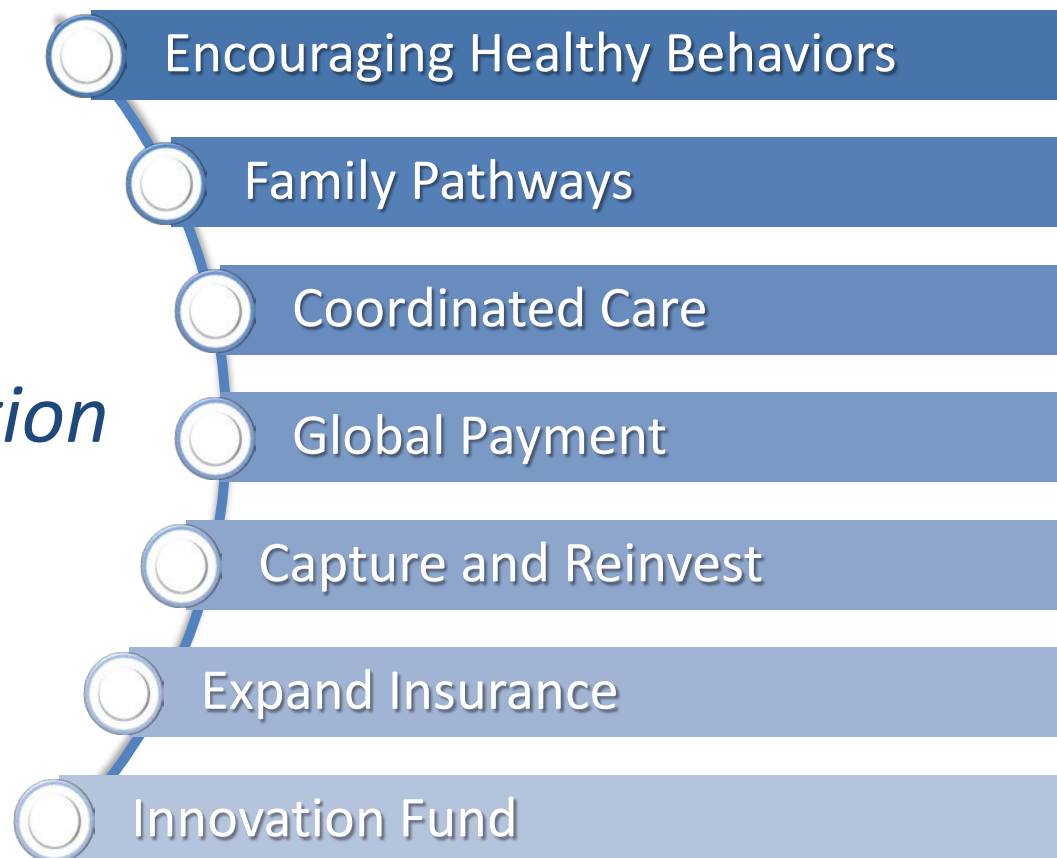

1. Far-Reaching
2. Atlanta Transformation
3. Better Health Atlanta
4. Promote Health Today

Strategy

Atlanta Transformation

Opportunity

Atlanta Regional Collaborative for Health Improvement

Financial Development:

- Backbone Support
- Independently Align Organizational Investments
- Pooling Investments for Collective Decision-making
- Innovative Investments for Sustainability

Opportunity

*The real opportunity
lies in collaboration.*

Atlanta Regional Collaborative for Health Improvement

The challenges that lie ahead for the health system are vast and complex.

We need a better path forward.
